

TOP DESTINATION

The Philippines is the preferred outsourcing and offshoring destination of companies from the US and Australia.

Ideal Setting

The Philippines has a stable democratic government with investment-friendly policies. It enjoys a vibrant economy driven by its huge skilled workforce and reliable infrastructure system.

Vast Pool of Talent

The country has an abundant supply of experienced university-educated tech professionals who have varied skill sets. They are largely fluent in English, the official language of business.

Cost-effective Operations

Wages, office spaces, and other operating costs are 60% to 80% lower compared with Western levels.

Unmatched Hospitality

Innately warm and welcoming, Filipinos embrace diversity and easily adapt to multicultural work environments.

Natural Business Partner

The Philippines has strong political, cultural, and historical ties with the US.

People4u is a leading outsourcing solutions provider in the Philippines.

We work with companies from diverse industry backgrounds and handle a wide range of projects with budgets.

**We do the work.
We take the risk.
You reap the rewards.**

It's really that simple.

people4u

WHY PEOPLE4U?

People4u offers IT outsourcing solutions that help companies mitigate risks and reduce costs; increasing their scalability, business focus, and overall competitive edge. We provide tested remedies for growth-impeding challenges that hinder companies from reaching their business goals.

Meticulous knowledge transfers and faithful adherence to best practices ensure the integrity of our outputs. Our clients retain full operational control. They can easily shift strategies and tweak workflows whenever they see fit. There are no hidden costs; details are spelled out right from the start so clients know exactly what to expect.

Intelligent resource and business process management give our clients a sizeable advantage over competitors. Meanwhile, customer satisfaction levels are raised substantially due to the prompt delivery of quality

“Our clients achieve a significant increase in productivity, profitability, and valuation.”

OUR OFFERINGS

Staffing Solutions

People4u helps clients fill skills gaps by augmenting internal competencies with external expertise. We continuously acquire top-notch talents and prep them for onsite or offshore deployment, on short-term or long-term engagements.

Managed Operations

Foreign companies that want to establish operations in the Philippines can do so with minimal risk exposure and accelerated time to market. They can take advantage of our prime office spaces, advanced tools, and experienced resources, which are all on plug-and-play mode.

IT Service Management

We monitor, manage, and support our clients' application and IT infrastructure round the clock. Swift, decisive measures are taken to address technology issues and preserve a seamless business-IT alignment.

Training Solutions

People4u runs an unrivaled center of excellence that offers technical and professional development courses to client personnel. Training sessions can be conducted onsite in clients' offices, or offsite in our own facilities.

Managed Support Services

Clients can tap our pool of core resources on demand. Instead of paying outsourced staff by the hour, clients buy buckets of hours that can be consumed for carrying out repetitive and intermittent maintenance tasks.

KEY BENEFITS

By using our services, client companies are able to:

Get big savings - Lower labor and overhead costs result in improved liquidity, easier cash flow management, and more leeway for expansion and innovation.

Tap skilled resources fast, at any time - A deep pool of tech talents not locally available becomes readily accessible.

Increase responsiveness and adaptability - There is greater flexibility in ramping up and tamping down resources when there are fluctuations in demand.

Free up key personnel - High-value resources can concentrate on core business tasks instead of doing recurring support work.

Streamline workflows - Refined business processes mean resources are utilized to maximum capacity and wastage caused by redundancy and downtimes is eliminated.

Improve service levels - Customer defection, which happens when employees are overstretched or overworked, is stopped in its tracks.

Explore new growth markets - Unsaturated sales territories offer exciting opportunities to raise revenues.

Employ best practices without the big expense - It is not necessary to shell out the considerable investment required to leverage leading technologies and methodologies.
